

Procurement

Manual procurement processes cause unnecessary administrative costs with time consuming approval flows. In SERTICA you have access to all relevant information for the entire procurement flow. **Optimise with paperless workflows, structured approval flows and invoice scanning to avoid excessive inventory, long lead times and late deliveries.**

Product

Streamline the procurement process from requisition to payment through SERTICA:

- Requisitions
- Quotes
- Approvals
- Contracted items
- Purchase orders
- Invoices

The entire procurement flow is processed electronically in SERTICA, including onboard requisitions, sending RFQs, evaluating quotations from suppliers and approvals. You can issue purchase orders as well as manage inventory and supplier catalogues.

This paperless workflow speeds up the process with a perfect overview of information. SERTICA gives you countless possibilities such as connecting orders to different projects, following your order status and evaluating suppliers and quotations.

Modules

Add modules to the standard product to get a total fleet overview of data in the office and on board the vessels:

- Invoice Management
- Logistics & Shipment
- Document Management
- SERTICA Connect
- Supplier Qualification
- Data Synchronisation
- Inventory Management
- SYNC
- Task List
- Budget
- Fleet Supervision
- Dynamic Dashboard
- Analytics

Please find more details on the following page and our website.

Benefits

- Reduced administrative resources
- Paperless workflow
- Third party integrations
- One cost and time-saving system
- User-friendly and fast system

The Product Suite

SERTICA is the market's most flexible and scalable solution for maintenance, performance, HSQE and procurement. More than 40 maritime customers and 1200 vessels worldwide are using SERTICA. The wide range of compatible modules combined with reliable communication and data management simplifies operations, optimizes performances and save costs. It displays the data in user-friendly dashboards presenting graphs and trends to act upon.

The Company

The software is complemented with ongoing consultancy from experts who know and understand your business. Together with Logimatic's 30 years of global experience in system development and problem solving, SERTICA is more than a software system. We build our partnerships on trust, knowledge and co-operation to keep moving our customer's maritime business. From our offices in Denmark and Singapore, we offer support to customers around the world.

The Software

Windows based platform based upon Microsoft SQL server. The software is IACS type approved by DNV/GL and Bureau Veritas.

SERTICA

Purchase Order System

Invoice Management

Manage the entire workflow and reduce the manual handling of invoices with up to 70%. By comparing the received invoice with the purchase order in SERTICA, the invoice can automatically be approved for payment.

A specially developed API makes it possible to add invoices created in other systems to SERTICA.

Fleet Supervision

A unique office database with a 100% accurate copy of all vessel databases. This allows you to access each individual vessel database instantaneously, as well as assessing data across all vessels. Reports can be created in Analytics to supervise all kinds of module transaction and important data, monitoring and communicating KPIs across the fleet.

Logistics & Shipment

Allow the forwarding agents or warehouses to enter delivery information, and the fleet to follow the complete track'n'trace process. Access the system and enter delivery information and print all needed documentation for shipments. Purchasers can manage the distribution and shipment themselves on behalf of the vessel, collecting line items from purchase orders and consolidating them into packages or carriers.

Document Management

Store, update and distribute documents safely between office and vessels. Automated version control allows editing without creating conflicting versions in a customised approval flow.

Document Management allows you to import and attach any kind of document to quotations, purchase orders and invoices.

You can access documents online through a link.

SERTICA Connect

Connects the buyer and supplier in a one-to-one private communication regarding pricing and delivery details. The supplier benefits from receiving request for quotes electronically, being notified by email and quoting online. Purchasers benefit from receiving prices electronically into SERTICA, which enables price comparison.

Speed up the process, reduce the workload and minimise data errors with SERTICA Connect.

Supplier Qualification

Enable purchasers to evaluate and negotiate with suppliers based on a combination of quantity and quality based-data. A number of quality based-data is defined in SERTICA including, but not limited to, quoting, ordering and delivery process evaluations. These allow and support supplier classification and automatically generates reminders.

Data Synchronisation

Synchronise information between ship and shore in an optimised and secure way. Experience a system of accurate and timely data alignment, which synchronises automatically. Transmission errors are automatically recovered, resulting in optimal data synchronisation.

Inventory Management

Manage information about components, locations, jobs, history, certificates and spare parts effectively. It offers an overview of your inventory, which is essential in relation to maintenance and procurement processes.

SYNC

Synchronise data between SERTICA and your ERP system to increase the level of automation. Achieve a stronger financial control with purchase orders in real time and constant access to invoice information.

Synchronise master data with minimum efforts in one shared data source.

Task List

Central to-do list for technical staff to complete advanced planning and resource optimisation. Get an easy overview of all tasks – both on vessel and fleet level.

Budget

Handle procurement and budgets for the entire fleet from your main office. Involve the vessels in making individual vessel budgets and get their input to forecasting. Receive monthly reports comparing e.g. budgets with actual expenses - both for the entire fleet and individual vessels.

Dynamic Dashboard

Design your own dashboards and achieve a graphical overview of any data in SERTICA. Create an overview of information such as job statistics, graphs designed with Excel and KPI highlights.

A great management and follow-up tool with a modern and structured layout of information.

Analytics

A unique tool developed to extract any relevant combination of data from SERTICA and export it directly into Microsoft Excel with graphs and pivots into included templates. Create customised reports and have it delivered to your mailbox.

Analyse data efficiently and identify areas for cost savings and new opportunities for your business.
